

CROSSRIDE UB 26

Lightweight wheel system to enhance your rim brake mountain bike

Wheelset weighs only 1700g System engineered for overall performance Hub efficiency with FTS-X freehub and smooth QRM bearings

Strong and durable for long-lasting performance

Reinforced rims feature H2 spoke drilling for increased lifespan Proven reliability of FTS-X freehub No maintenance QRM bearings

Give your bike the Mavic look and feel

Large and visible Mavic graphics Straight pull bladed spokes, a Mavic signature Handbuilt in Europe

For those who still prefer the lightweight simplicity of rim brakes, the Crossride UB is a smart choice for off-road versatility. The rim is built specifically for rim brakes and features our H2 reinforcement at the spoke holes for added strength and durability.

And at just 1700g for the wheelset, it's a lightweight option for better handling and easier climbing. The Crossride UB is only available for rim brakes and is compatible with frames and forks using standard quick releases.
