

ALLROAD 1

Improved Comfort and Stability

A 25mm wide alloy rim allows you to ride wider tires, enhancing riding comfort and ability to run lower pressures across various terrains.

Enhanced durability

Specific rim design combined to harder lab tests are allowing you to pack all your stuff and resist longer to gravel impacts

ID360: A simple, reliable yet efficient dual ratchets freewheel system.

Effortless Maintenance

J-bend spokes offer robust performance and simplify replacements, ensuring long-lasting reliability. The ID 360 Freehub system offers reliability, easy servicing, and long-term durability
