Easy to service

Quick and easy to fix thanks to J-Bend spokes Two replacement spokes delivered with every wheelset Wide rim shape facilitate DH casing tire between 2,0" and 3,0" set-up, which allows pilots to choose their favourite set-up

"The limited-edition Deemax DH YLW Mullet wheel celebrates the 25th anniversary of the iconic Deemax DH in style. Featuring its legendary design in an even brighter yellow, this tribute wheel pays homage to the legends who have written the greatest pages in its history, including Nicolas Vouilloz, Greg Minaar and Sam Hill.

This exceptional wheel was designed at the foot of the French Alps and developed, tested and approved by the riders in the Mavic DH team. It features a 30mm wide welded rim specifically designed to absorb the most violent impacts and to smooth out the vibrations of riding, providing maximum confidence and active relaxation on aggressive terrain.

The Deemax DH YLW is fitted with 28 J-Bent spokes in swaged steel, creating the best possible balance between robustness and compliance for maximum efficiency on the most demanding descents. Designed to be quick and easy to repair in the event of a failure, these spokes don't require a tedious pit stop to get back on the track quickly. Each wheel comes with two replacement spokes for even greater peace of mind.

The Deemax DH YLW Mullet's wide rim shape makes it easy to fit DH tires with cross-sections between 2"" and 3"", offering riders exceptional versatility to adapt their tire setup to any condition.

The ultimate downhill wheel, the Deemax DH YLW Mullet celebrates Mavic's heritage and innovation and has a proven track record for providing top performance on the roughest descents.. Choose total confidence in demanding terrain, with ease of maintenance and versatility as bonuses."
